

## **AIA FLORIDA Southwest Continuing Education Meeting**

### **Reinforced Masonry vs. Hurricanes & Tornadoes**

Learning Objectives:

- Identify concrete masonry's inherently sustainable qualities.
- Discuss USRC's three dimensions of safety, damage and recovery, and the effects of resilient construction.
- Review "lessons learned" regarding design and construction failures during several past hurricanes and tornadoes, while defining the type of wall structure and the impact of an entire community.
- Learn how the use of concrete masonry products can potentially contribute to sustainable and economical building projects.

### **Naples: May 8, 2019 – Wednesday**

7:30 am to 9:00 am

IHOP
