

AIA FLORIDA Southwest Continuing Education Meeting

Vapor Barriers: Nuisance or Necessity?

Attendees will know how to design an overall system to help prevent moisture related problems such as floor covering failures, mold issues, concrete drying concerns, and much more. Learn about the most recent standards and industry-expert recommendations in the Vapor Barrier industry, including ASTM standards, ACI recommendations and contributions to sustainable construction. Attendees will learn and be able to explain the difference between a vapor Retarder and a Vapor Barrier and know how to specify each.
