

## **AIA FLORIDA Southwest Continuing Education Meeting**

### **Enhancing your Design with Awnings and Canopies**

#### **Course Description**

This course covers a range of informational topics about awnings and canopies. The following topics are included in the presentation of awnings and canopies respectively: history, definitions, styles, frames, fabric, attachments, energy efficiency, UV protection, engineering, codes, permits and regulations.

- *Energy efficiency benefits of awnings and canopies.*
- *Importance of shade from harmful UV rays and how that protection can be found through the use of awnings and canopies on buildings.*
- *Overview of the different engineering, codes, permits, and regulations that are needed to successfully construct an awning or canopy. They are also provided with information on how to further educate themselves on specifics they will need for their project.*
- *History, definitions, styles, frames, fabric and attachments to awnings and canopy's respectively.*
